DETAILED ACTION

1. In view of the new prior art cited by the applicant in the RCE, the allowance of claims 1-5 is withdrawn. An Office Action on the merits is presented below.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by EPO Document 822325.

The European Document has disclosed the invention as claimed showing a common intake passage (16) for an engine. A rotary type throttle valve (10) is placed to control the airflow in the branched individual intake passages (14). The valve (10) is circular when viewed along its rotational axis. Rotation of the throttle valve (10) will open all or only some of the branched passages based on the rotational position of the throttle valve (10).

With regard to claim 2 note that the valve (10) has 3 openings each opening related to a specific branch passage.

With regards to claim 5 note that the portion in the interior of the throttle valve may be considered a "volume chamber".

3. Claims 6-8 are allowed.
